Dear Mr Plowman

Re: Wolli Creek Valley Odour Control Unit

While we await the assurances we sought in my letter to you of 13 August, we want to start the process and to stress our seriousness in participating in the MCA process. Accordingly, we put forward the following proposals regarding the criteria to be used in the MCA for comparing the two potential sites for the OCU, and the weightings we believe appropriate to them.

	Relates to	Weight	Character
1	Impact on natural environment	20	<i>permanent</i>
2	Cost of construction	15	<i>one-off, major</i>
3	Operation and maintenance	15	<i>ongoing, significant</i>
4	People x Time impact	10	<i>1 residence, ongoing, vs many Park users, brief</i>
5	Security	10	<i>ongoing</i>
6	Timeframe	10	<i>one-off</i>
7	Impact on built heritage	10	<i>permanent</i>
8	Cost of land acquisition	10	<i>one-off</i>

We think that the ratings for each site on these criteria should be a matter for discussion and we look forward to the opportunity to begin those discussions at an early stage.

Regards

Peter Stevens
