

## Cyclist classification

**Lycras** – ride road bikes, want to use **roads, but** safely, going places for training purposes, travel fast

**Locals** – going shopping, to library etc, not in a hurry

**Recreational** – like off-road, pleasant surrounds, family safe, not in a hurry

**Commuters** – aim to get from home to work efficiently and safely, not keen on delays

**Mountain bikers** – looking for off-road, adventure trails, often at speed

**Delivery folk** - looking for the shortest (time wise) route from A to B, mostly very local

Of course, some operate in more than one mode at different times.
